UI Redesign for Quora and E-learning

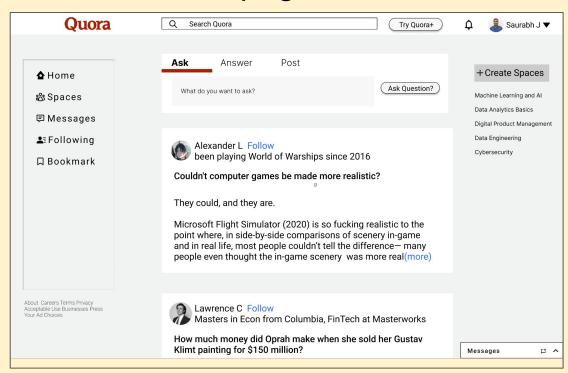

Quora - Current Homepage

Issues:

- Redundant information on homepage, such as "Add question" button
- Use of icons without page names on right side of Quora logo creates confusion for users
- 3. Clicking on "What do you want to ask or share?" opens a new tab unnecessarily.

Revised Homepage

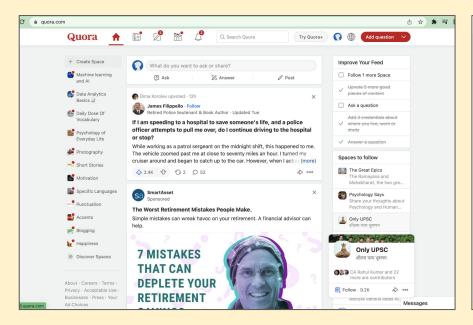

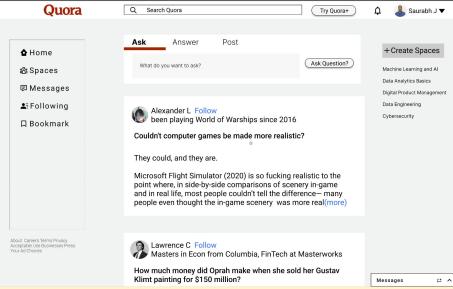

Changes made:

- Removed redundant information from homepage
- Simplified homepage by adding page names and logos to the left of the page
- Updated UI to prevent new tabs from opening when clicking on "What do you want to ask"

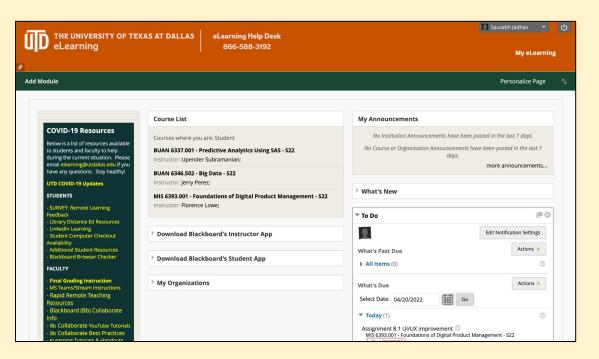

Overall, the homepage was streamlined by removing unnecessary information and simplifying the remaining content.

Comparison of existing & revised homepage

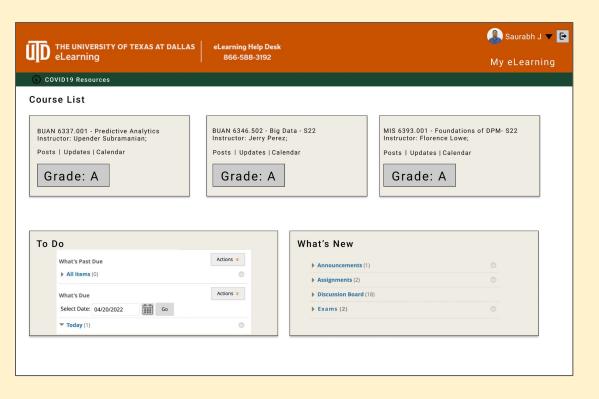

eLearning - Current Homepage

Issues:

- Difficulty in accessing individual subject grades; requires multiple clicks
- Overwhelming amount of information on homepage, hindering navigation to important information
- Absence of information related to exams.

Revised Homepage

Improved platform by:

- Creating separate boxes for each subject with its own overall grade
- Simplifying homepage by reducing the amount of information displayed
- 3. Adding a new tab for exam-related updates.
